ORDER NOW

The advertisement features a rack server with a yellow and white color scheme. The background is a yellow honeycomb pattern. A price tag on the right indicates a monthly cost of €19.99. A central button says 'ORDER NOW'.

Webtropa.com uses only brand name hardware in our dedicated servers. Even the smallest dedicated server oozes performance. You get an incredibly well-equipped dedicated server at an affordable price thanks to the especially powerful CPUs and large volume of RAM. If you need even more power and, above all, want to work faster, you can choose a dedicated server with SSD hard drives which provide fast data access. In addition, you always have the option to supplement your server with additional hard drives. Dedicated servers from webtropa.com enable virtualization. You get optimum performance for virtualization of servers with up to 16 vCores and 64 GB DDR4 RAM. With this performance, you can operate multiple virtual machines on one physical server. For virtualization, webtropa.com provides the virtualization software, vSphere from VMware, as well as Proxmox and Hyper-V. Please note that you must conduct for the setup configuration of the virtualization software and that we do not provide that service. With our Power and Ultimate servers, remote management is included free via KVM over IP. For the dedicated servers with KVM over IP (IPMI), you receive an extensive tool for the remote management of your servers free of charge. Webtropa.com was one of the first German providers to make this service available from the beginning. Previously, such services were reserved for individual server farms or custom server hardware.
